Joe, you sent this message to CCM. Is there a problem? From Sue's message it sound like she was handling this properly so not sure why you stated that folks are not passing the "hot potato."

not sure what this is about, but thought you would want to know about it (probably already do). Can TSB help with data review?

Sorry Boss I will do my best but perhaps the lab folks need practice on emergencies....do not hold the hot potatoe...If you can not do the deed pass it on as soon as possible....If you need help...let all know...as soon as possible....Do not become the rate determinant step....etc. JoeS

I told John Curry that I would peer review but, since there was a note that you had volunteered and I am hung up with the mercury analyses, I thought that I should take these two to you. I'll be happy to do the later ones - I just don't want to hold these up. However, if it should be necessary for me to do these, just please let me know. Thank you.
